🔗 LeetCode

EDUCATION

B.Tech in Computer Science and Engineering , Bennett University, Greater Noida (CGPA: 7.59)	2022 – 2026
Class XII (CBSE) , Satyam International School, Patna, Bihar (81.67%)	2020 – 2021
Class X (ICSE) , Don Bosco Academy, Patna, Bihar (87.8%)	2018 – 2019

RELEVANT SKILLS

Programming Languages: C++, Python, JavaScript

Web Development: HTML, CSS, Tailwind CSS, React.js, Next.js, Node.js, Express.js, REST APIs, Django

Databases: MongoDB, PostgreSQL, MySQL, Prisma ORM

APIs: Socket.IO, Google Maps API, Gemini API

Tools & CS Fundamentals: Git, GitHub, Docker, CI/CD, Postman, DSA, OOP

PROJECTS

Genify [Next.js 15, React 19, Prisma ORM, tRPC, Inngest, Gemini API]

- Built an AI-powered SaaS application using Next.js 15, React 19, tRPC, Prisma ORM, and Gemini API for automated code generation workflows.
- Implemented an AI-driven code generation and execution system with sandboxed environments (E2B) and real-time agent workflows using Inngest Agent Kit.
- Integrated secure user authentication, file handling, and automated background jobs, creating a scalable and production-ready SaaS platform.

OrbitRide [React JS, MongoDB, Express and Node JS, Socket.IO, Google Maps API]

- Developed a ride-hailing web app with React.js, Node.js, Express.js, and MongoDB, featuring secure authentication using JWT bcrypt.
- Implemented real-time ride booking, driver search panels, and live driver location updates using Socket.IO.
- Integrated Google Maps API for location autocomplete, geocoding, and real-time route visualization, enhancing user experience with accurate pickup and drop-off selection.
- Built RESTful APIs with Express Validator, cookie-parser, and CORS for robust backend validation and secure session management.

BroLearn: Collaborative Learning Platform with Django Backend

- Engineered a full-stack learning platform using Python and Django (MVT architecture), designed to facilitate real-time study group interaction in a structure similar to Discord.
- Built robust CRUD functionality (Create, Read, Update, Delete) for dynamic resources, including study rooms, topics, and real-time chat messages within each group.
- Secured the application by integrating native Django User Authentication and Authorization, enabling user registration, login and logout, and profile management for personalized access.
- Developed a centralized Activity Feed and Search functionality (optimized for dynamic models) to improve user discovery of new rooms and track system-wide interaction.

ACHIEVEMENTS

- Solved 200+ DSA problems across platforms like LeetCode, Codeforces, GeeksforGeeks, demonstrating strong analytical and algorithmic thinking 🏆 **Codolio**.

CERTIFICATIONS

- **Google Cloud Certified Professional Cloud Architect** | **Exploratory Data Analysis for Machine Learning**
